AC UPS Systems supporting your Critical Equipment

#### NHS Sites

Harland Simon provides products from the best UPS manufacturer's to provide:

- Resilience and 'five 9's' (99.999%) availability delivered from modular and N+1 system designs
- High efficiency systems providing real cost savings in energy costs over existing UPS systems
- Extended Battery Run time options (increased autonomy)

#### Local Support

Although the main infrastructure components within a hospital site are supported, the loss of local services can have a significant impact.

A UPS relies on various technologies from detailed electronics through to the simple fan. All of these require maintenance to ensure your UPS continues to supply the uninterrupted power you need. Failure of your UPS can be critical - shutting down a department or the entire building.

Choose from a range of standard plans covering preventive maintenance through to 24hrs, 365 days a year, guaranteed response contracts. Ensuring that your UPS is regularly maintained is vital.
